Perma-Glaze® is a worldwide leader in the resurfacing and refinishing of numerous surfaces and fixtures. Our state-of-the-art technology easily refinishes bathtubs, showers, sinks, cabinets, appliances, countertops, ceramic tile, porcelain, metal, fiberglass, Formica, cultured marble, and more. In just a few hours, without removal, the Perma-Glaze® system of polymer resins restores worn and damaged surfaces to their original luster — at a fraction of the replacement cost (SAVINGS are typically 70% to 85%). The remarkable beauty of Perma-Glaze® is the result of our proprietary process that combines unbeatable depth and richness of color with a uniquely ultra-durable surface that retains its lustrous like-new look. Your home or commercial facility will look like you spent thousands of dollars on remodeling, all without breaking your budget. The results will astound you!

Why Replace It? Perma-Glaze It!

Safeguard Your Family

Bathroom and kitchen fixtures need refinishing for both cosmetic and hygienic reasons. When a surface appears worn, cracked and stained, it has become pitted or porous, allowing dirt and germ deposits to build up. With the Perma-Glaze® process, the old, worn, unsightly surface is cleaned and chemically etched. Any chips, scratches or structural discrepancies are leveled and sanded smooth. Then, several layers of the exclusive Perma-Glaze® synthetic porcelain are applied to the surface, creating a strong, durable, lustrous finish that is fully guaranteed.

Only a high-gloss vitreous finish like Perma-Glaze® can be regularly disinfected and sanitized, yet remain stain-resistant, safe and appealing. Also ask your representative about the Perma-Glaze® Lead-Lock Procedure that prevents leaching of lead oxides in old porcelain bathtubs and sinks. The Perma-Glaze® process is quick, safe, long-lasting and helps protect those you love.

Please inquire about these additional services:

Just Like New!

Traction Treatment

Prevent slip-and-fall injuries: When applied to tile, porcelain, concrete, marble, brick or other hard mineral surfaces, Traction Treatment actually makes the surface safer when wet than the original surface was when dry!

Bathtub Liners & Wall Surrounds

Perma-Glaze® acrylic bathtub liners and wall surrounds, which are custom made to fit over old, drab, peeling or cracked bathtubs, walls, and shower stalls, are a simple and inexpensive solution. You will love this one day remodel!

Frequently Asked Questions

“Can my existing fixtures be cleaned or polished to restore the shine?”

If your fixture is made of fiberglass, acrylic, or cultured marble, it can in some cases be polished (consult your local franchisee). If normal household cleaners fail to bring back the shine on your fixtures, however, your finish has most likely been damaged or worn and become pitted and porous. The more you scrub, the worse it will be.

“Why should I Perma-Glaze instead of replacing my existing bathtub?”

Replacement fixtures are almost always of lesser quality than the original (They don't make them like they use to!). What's more, the Perma-Glaze® restoration/refinishing process takes hours versus weeks of expensive, messy and inconvenient removal and replacement of bathtubs, tiles and other fixtures. Tub replacement, for example, costs an average of \$1,500 to \$3,800. The cost of a Perma-Glaze® refinishing is only a fraction (about 15% to 30%) of that replacement cost – you save up to 85%! In short, Perma-Glaze® is a quick, clean and inexpensive alternative to replacement.

“Can Perma-Glaze repair chips and cracks?”

Perma-Glaze® easily restores worn, chipped or broken tile, porcelain, fiberglass, vitreous china, cast iron, stainless steel, Formica, and cultured marble, without the hassle or expense of replacement. Single chip repairs result in a matching, like-new finish, durable enough that they are backed with the same Perma-Glaze® guarantee.

“How long does it take to Perma-Glaze a fixture, tile or appliance?”

Usually a few hours and always less than one day. Most of the time is spent preparing the original surface for reglazing. Once Perma-Glaze® has been applied, there is only a 48 hour “curing” time required before the fixture can be used. (Accelerated curing time is also available.)

“Does a Perma-Glazed surface require special care?”

No, Perma-Glaze® can be cleaned with any non-abrasive, fixture or tile cleaner.

“Is Perma-Glaze real porcelain?”

It is a state-of-the-art synthetic glaze that has the luster and texture of porcelain, with unbelievable durability.

“Does Perma-Glaze come in different colors and finishes?”

Absolutely! Perma-Glaze® is available in a wide variety of designer colors and finishes – gloss, matte, satin and speckle – sure to complement any decor. Custom colors are easily mixed to match existing surfaces.

“Why should I choose Perma-Glaze for my refinishing needs?”

For over 25 years, Perma-Glaze® has built one of the most established, respected names in the multi-surface restoration industry. In addition, our products do not contain harmful polyisocyanate resins. Perma-Glaze® is also incredibly beautiful, with exceptional shine and depth.

“Will Perma-Glaze cause any harm to my home or pets?”

Definitely not. Any odors from chemicals we use are exhausted by a window or fan and gone within a few hours.

“What should I do to prepare the fixture for Perma-Glaze?”

Any plumbing problems such as leaking faucets, broken handles or pipes should be repaired in advance.

“Is there a charge for an estimate or inspection?”

All estimates and local on-site inspections are free of charge. **Call your Perma-Glaze® professional today and ask about additional products and services.**
